

<b>SDG Goal 16</b>	<b>Peace, justice and strong institutions</b>
<b>SDG Target 16.1</b>	<b>Significantly reduce all forms of violence and related death rates everywhere</b>
<b>SDG Indicator 16.1.1</b>	<b>Number of victims of intentional homicide per 100,000 population, by sex and age</b>
<b>Time series</b>	<b>Victims of intentional homicide</b>

### 1. General information on the time series

- Date of national metadata: 09 March 2022
- National data: <http://sdg-indikatoren.de/en/16-1-1/>
- Definition: The time series measures the total number of victims of intentional homicide and per 100,000 inhabitants. The here presented total number of victims only includes completed offences.
- Disaggregation: age group; sex

### 2. Comparison with global metadata

- Date of global metadata: July 2016
- Global metadata: <https://unstats.un.org/sdgs/metadata/files/Metadata-16-01-01.pdf>
- The time series is partly compliant with the global metadata. It only covers completed criminal offences (attempts are not included).

### 3. Data description

- The data on victims of intentional homicide is derived from the Police Crime Statistics (PCS) by the Federal Criminal Police Office (BKA). The PCS covers known criminal offences, victims and suspects. It includes attempts as well as completed offences for every year. Since the data is summarising only cases which were brought to the attention of the police, our numbers underestimate the real situation. If a person is a victim of more than one crime or repeatedly victim of the same crime, it is counted multiple times. The data is calculated as a sum of the individual data sets of the Länder's criminal police bureaus.

The population data comes from the intercensal population updates, the basis of which is the last census conducted in 2011. The population data is rolled forward using statistical results on natural population change (births, deaths) and migrations. For 2010, the population was calculated backwards using the 2011 census and migration, birth and death statistics.

## 5. Metadata on source data

- Victims of intentional homicide (only available in German): PKS 2016 yearbook volume 2 - victims:  
[https://www.bka.de/DE/AktuelleInformationen/StatistikenLagebilder/PolizeilicheKriminalstatistik/PKS2016/pks2016\\_node.html](https://www.bka.de/DE/AktuelleInformationen/StatistikenLagebilder/PolizeilicheKriminalstatistik/PKS2016/pks2016_node.html)
- Quality Report - Intercensal population updates 2020:  
<https://www.destatis.de/EN/Methods/Quality/QualityReports/Population/intercensal-population.pdf>

## 6. Timeliness and frequency

- Timeliness: t + 4 months
- Frequency: Annual

## 7. Calculation method

- Unit of measurement: Number; Per 100,000 inhabitants
- Calculation method:

$$\text{Victims of intentional homicide} = \frac{\text{Victims of intentional homicide [number]}}{\text{Population [number]}} \cdot 100,000$$
